Hi! I'm Caden

“Yishun” part of YIJC Class of 2011

NTU BEng Aerospace Engineering (2019)
SMU MSc Quantitative Finance (2024)

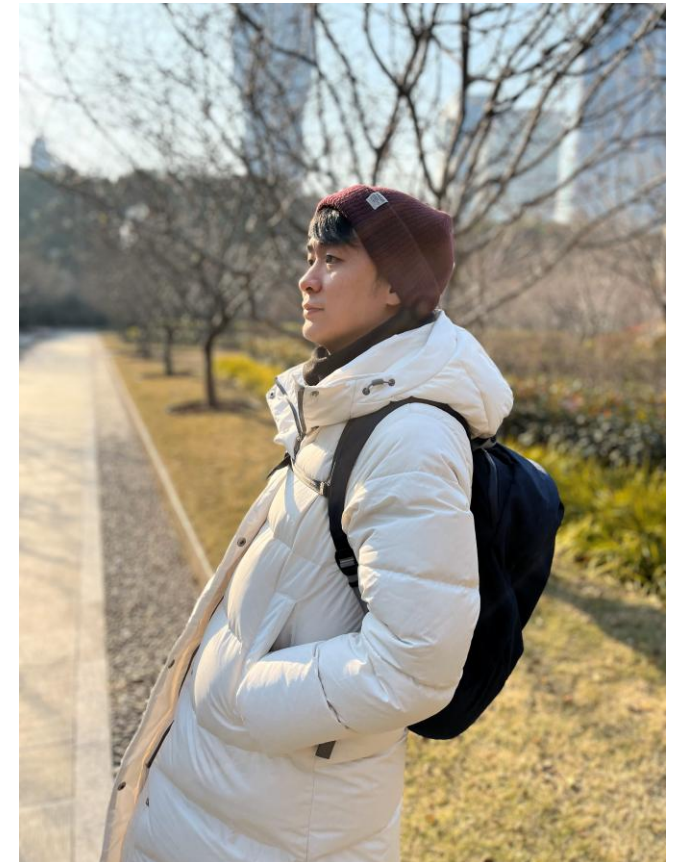

Derivatives Analyst @ SGX Group

Industry: Financial Markets

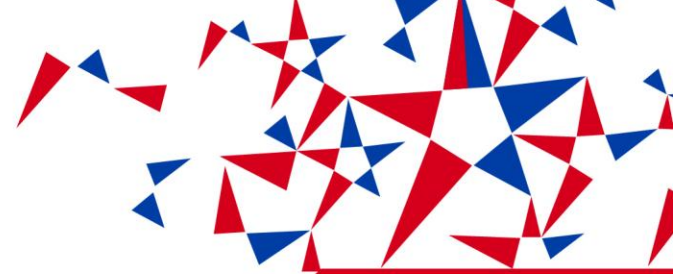

Youth Empowerment & Education

Active mentor to undergrads and grad students from NTU and SMU

Journey After YIJC

Studied Engineering, spent 1 year overseas on study exchange and internship

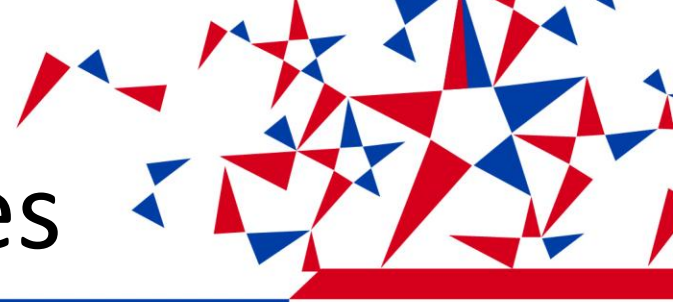

Took 1 year off school to explore banking and finance, gained knowledge and career in a different field

Pursued further studies part-time while working, explored new careers

Three Guiding Principles

Diversification is key

One does not need to limit one's career to what one studies.

Pursue what you love, but always equip yourself with essential skills for industry.
Seek knowledge beyond the classroom.

Take calculated risks

Sometimes we need to cross our comfort zone in order to gain.

When risks paralyze you, think about “what could be the worst that could happen?” If it's manageable, be bold and exploit it!

“Stay Hungry, Stay Foolish” – Steve Jobs

Be a sponge, always seek to broaden your horizon and world view.
Ask questions, be inquisitive, and do not fear!

Wisdom Cookie

Once you have learnt how to learn,
you can learn whatever you want to learn,
whatever you need to learn,
And that is when you are truly free.

Enjoy learning, enjoy today, enjoy YIJC!
